

M. Kella DOUZOUNÉ

Geospatial data analyst & Project manager

Congo Brazzaville | kella.douzoune@gmail.com | www.dkella.com

Tel: +2347035082691

PROFESSIONAL SUMMARY

Over 16 years of expertise in geospatial information systems, data analytics, and project management within international development contexts. Proven ability to process and analyze large geospatial and survey datasets, develop real-time monitoring dashboards, and deliver capacity-building across multi-country projects. Certified PMP and GISP with advanced skills in Python, Power BI, and spatial data modeling, driving digital transformation and sustainable infrastructure initiatives aligned with development goals.

CORE COMPETENCIES

- Geospatial Data Analysis - Project Management - Spatial Data Modeling & Kriging
- Survey Data Collection Platforms - Power BI Automation & Dashboards - Digital Transformation
- Data Quality Control - Machine Learning Techniques - Data Integration & ETL Pipelines
- Python (Pandas, GeoPandas) - Stakeholder Engagement - Capacity Building & Training

PROFESSIONAL EXPERIENCE

Data Mapping Researcher Consultant | RDTs

2026

African Development Bank | Home based

- Built a structured metadata repository cataloging 100+ heterogeneous data sources spanning national statistical systems, regional databases, satellite imagery, and alternative data streams.
- Performed coverage gap analysis across seven resilience dimensions, quantifying "data deserts" and interoperability constraints to inform strategic data investments.
- Prototyped machine learning and Earth Observation integration pathways for predictive fragility monitoring, advancing early warning capabilities.
- Delivered analytics-ready datasets and six technical reports, including automated gap analysis and prioritization matrices to guide operational decision-making.

Data Management & Geospatial Tracking System Consultant

2023 – 2026

World Health Organization | Congo Brazzaville

- Spearheaded the design and harmonization of centralized geospatial databases, ensuring high data quality, security, and timeliness to support polio and immunization campaigns.
- Conducted advanced geospatial and statistical analyses to generate risk maps, coverage assessments, and monitoring indicators, enhancing decision-making for outbreak responses.
- Developed and maintained automated ETL pipelines, APIs, and workflows for efficient data ingestion, validation, and visualization using Python and GIS tools.
- Deployed and optimized electronic data collection platforms (ODK, Survey123, KoboToolbox) across multiple countries, improving data accuracy and reporting speed.
- Delivered capacity-building programs, including SOPs, webinars, and coaching, to over 1,500 data managers and GIS focal points, strengthening regional data management capabilities.
- Collaborated closely with WHO headquarters, regional offices, country teams, and partners to align data systems with organizational policies and cybersecurity standards.

Senior Geospatial & Data Analyst Specialist | ICT

2021 – 2024

African Development Bank Group | Abidjan, Côte d'Ivoire

- Led the deployment of the RASME/KoboToolbox remote supervision system across 29 countries, integrating GPS, multimedia, and satellite imagery into real-time dashboards.
- Architected and automated Power BI dashboards for project monitoring and safeguard tracking, enabling timely and data-driven decision-making.
- Coordinated multi-stakeholder training sessions and comprehensive documentation to ensure sustainable adoption and capacity enhancement of geospatial tools.

GIS, M&E, and Mobile Data Collection Specialist | FCV

2020 – 2022

The World Bank | N'Djamena, Chad

- Implemented Geospatial Data Management Systems (GEMS) to support national development programs, facilitating data-driven planning and monitoring.
- Supported digital transformation initiatives within government institutions by integrating GIS-based analytics to improve program effectiveness, which included the development of user-friendly dashboards and tools that enable real-time data analysis and decision-making.
- Delivered extensive training to over 1,000 professionals in GIS and mobile data collection methodologies, fostering local expertise and sustainability.

GIS Stakeholder Engagement Consultant

2022

eHealth Africa | N'Djamena, Chad

- Led the development of a comprehensive health facility database for Chad, enhancing geospatial data availability for health infrastructure planning and management.

Information Management Officer

2021

United Nations International Children's Emergency Fund (UNICEF) | N'Djamena, Chad

- Coordinated and managed data collection processes to support humanitarian operations and evidence-based decision-making.
- Delivered targeted training to staff in data collection and management methodologies, enhancing organizational capacity.
- Provided strategic guidance on monitoring and reporting frameworks to program sections, ensuring accountability and results tracking.

GIS AFRO Consultant

2020

Making Consulting & World Health Organization | Congo – Brazzaville

- Supported the Regional Center in strengthening GIS capacity for disease surveillance and health emergency preparedness.
- Performed population data modeling to inform targeted health interventions and resource allocation strategies.
- Disseminated the eSURV tool and its extension to high-risk priority African countries, enhancing regional disease monitoring capabilities.
- Delivered comprehensive training to government officials and partners in accessing and using geospatial data for evidence-based health planning.

Field Data Collection Supervisor

2017 – 2018

e-Health Africa | N'Djamena, Chad

- Conducted field data collection operations with 60 data collectors across the Lake Chad regions, ensuring high-quality data capture for health system assessments.
- Installed and configured mobile data collection tools on tablets and mobile phones, standardizing digital workflows for field teams.
- Provided technical expertise, budgetary oversight, and operational recommendations to the operations team, optimizing resource allocation and program efficiency.

Systems Administrator

2014 – 2017

World Vision International | N'Djamena, Chad

- Managed hardware and software information assets, ensuring optimal system performance and data security across field operations.
- Provided technical support to end-users and maintained IT infrastructure, minimizing downtime and enabling continuous programmatic delivery.
- Delivered targeted training to staff in IT tools and database access protocols, enhancing digital literacy and operational efficiency.

Project Assistant for Doctoral School Support

2013 – 2014

Organisation Internationale de la Francophonie | Bureau Régional AUF Maghreb Rabat

- Mapped AUF member universities across the three Maghreb countries, establishing a comprehensive institutional database for regional collaboration.
- Conducted systematic mapping of training module needs across IST doctoral schools in the Maghreb, informing curriculum development and academic capacity building.
- Created a "users/documents" database to support knowledge management and resource sharing for doctoral schools across the region.
- Designed and delivered educational workshops for IST doctoral schools, strengthening research methodologies and academic networking, which included hands-on training sessions, collaborative projects, and opportunities for participants to connect with experienced researchers in their fields.

Correspondence Controller

2009 – 2013

World Vision International | N'Djamena, Chad

- Managed correspondence workflows between international sponsors and enrolled children, ensuring timely communication and program integrity.
- Provided technical support to cluster users, resolving system issues and maintaining operational continuity across field offices.
- Delivered training to staff on information management tools, enhancing data accuracy and compliance with sponsorship protocols.

National GIS Officer

2008 – 2009

International Organization for Migration (IOM) | N'Djamena, Chad

- Coordinated and managed geographic information systems (GIS) to support Displacement Tracking Matrix (DTM) implementation and humanitarian response operations.
- Designed and maintained spatial and geographic databases, ensuring data integrity and accessibility for operational decision-making.
- Produced and updated migration maps to visualize population movements and displacement patterns for stakeholder reporting.
- Delivered targeted training to staff in data collection and management methodologies, strengthening field team capabilities, which improved the accuracy and efficiency of data collection processes in the field.

Information Management Associate

2008 – 2009

United Nations High Commissioner for Refugees (UNHCR) | N'Djamena, Chad

- Managed collection, processing, classification, and harmonization of data from diverse protection clusters to support evidence-based humanitarian programming.
- Designed GIS-based tools for mapping health services, enabling improved access analysis and service delivery planning.
- Monitored key indicators across multiple protection clusters, ensuring timely reporting and accountability to stakeholders.

- Produced monthly surveillance data dashboards to visualize trends and inform strategic decision-making for field operations.

EDUCATION

Ph.D. in Geospatial Information Science and Technology and Sustainable Development African Regional Institute for Geospatial Information Science and Technology (AFRIGIST) Ile-Ife, Nigeria. Thesis topic: <i>Spatial Decision Support System (SDSS) for Animal Disease Surveillance in Chad</i>	2026
Master Certificate in Geo Information in Disaster Situations University of Copenhagen, Denmark	2025
Master 2 in Computer Science Applied to GIS University of Douala & ENSG Paris (2012–2017)	2017
Master 1 in Advanced Computer Science Institut Supérieur des Sciences Appliquées, Chad	2012
Bachelor Computer Science Institut Supérieur des Sciences Appliquées, Chad	2011
Diploma in Information Technology Pan-African Institute of Human Development, Kaduna Nigeria	2007

PROFESSIONAL CERTIFICATIONS

- Project Management Professional (PMP) – PMI (June 2025)	- Geographic Information Systems Professional (GISP) – GISCI (July 2025)
- Certified Associate in Python (PCAP-31-03) – Python Institute (October 2025)	- UN Data Analytics Professional – UNSSC (December 2024)

TECHNICAL SKILLS

Geospatial & GIS Tools	ArcGIS Pro, QGIS, PostGIS, Esri Dashboards, StoryMaps
Programming & Automation	Python (Pandas, GeoPandas), SQL, Power BI Automation
Data Integration & Workflow	FME, ETL Pipelines, APIs
Mobile Data Collection	KoboToolbox, ODK, Survey123

LANGUAGES

English (Professional Working Proficiency) | **French** (Professional Working Proficiency)

SELECTED ACHIEVEMENTS

- Deployed WHO's Geospatial Tracking System across 8+ fragile countries, cutting reporting delays from 10 to 2 days.
- Rolled out the RASME/KoboToolbox system for the African Development Bank, covering 29 countries with real-time geospatial dashboards.
- Trained over 3,500 professionals across Africa in GIS, mobile data collection, and digital monitoring systems, enhancing regional capacity.
- Developed automated Power BI dashboards that improved safeguard tracking and project monitoring efficiency, allowing stakeholders to visualize data trends and make informed decisions based on real-time insights.
